

EOM OFFSHORE
Director of Product Development

The Director of Product Development (the “Director”) will have full responsibility for all (new) product development activities at EOM Offshore. He or she will provide vision and leadership for creating mooring products and services that effectively solve customer problems. In this role, he or she will work continuously to improve product quality, ensuring that the EOM brand and the reputation of its parent company are unquestioned. The Director will ensure that all technical personnel, subcontractors and consultants are qualified, directing their activities as needed. He or she will manage all quality assurance activities.

Characteristic Duties

- Coordinate with the Founders to document, systematize and update the unique mooring systems and related components that enable the deployment of sensitive instruments in high sea-state environments and that provide power to the instruments and real-time data transmission from the instruments through the sea surface to shore (the “Technology”)
- Manage the development of commercial products using the Technology, achieving the goal of making the Technology more readily available to the public while simultaneously ensuring that EOM’s objectives are met.
- Work with Plant Manager to create an effective Quality Manual, establishing SOPs, testing requirements, approved bill of materials (B.O.M.s), job travelers and related documentation.
- Provide guidance and leadership to the internal technology team and work with EOM’s parent company and other outside vendors as required.
- During 2012-2013, the Director will work closely with the President and the General Manager in their efforts to obtain the appropriate ISO certifications.
- Work with the Founders, parent company, vendors and third parties to design products that meet and or exceed customer requirements.
- Attend industry trade shows as required. Speak for and represent EOM’s interests at customer and/or industry events on occasion. Assist the Director of Sales in answering customers’ technical questions.
- Prepare departmental budgets, updates and reports as required by the President.

Reporting

The Director of Product Development reports directly to the President.

Desired Qualifications

Appropriate academic background or its equivalent relevant work experience, enhanced by a minimum of 8-10 years of increasingly successful and creative achievement. Candidates for this position are recognized as leaders and must have experience managing projects and/or teams. They should have demonstrated high levels of creativity and independence with foresight and judgment in planning, organizing, and guiding complex scientific projects.

Applying

All interested parties are encouraged to send a curriculum vitae (CV) and cover letter to:
jobs@eomoffshore.com

Salary commensurate with experience and qualifications
